

# Privacy Policy

None of your personal data is tracked, used, analyzed or sold, in any way. The only thing that we save is your email address and password so you can log in to your Superfocus on both mobile and desktop allowing your projects to sync across all your devices.

We use the database services of Google Firebase to store login credentials and account data. Their privacy policy can be read <https://firebase.google.com/support/privacy/>

Thank you.
